ARE YOU SAFE?

Comments: I think it's best to start from the app name since it seems like we will be branching off from this idea.

The font is in small caps, has been shadowed and has character spacing to make it look less crowded.

Comment on any changes you want to be made.

Background color, font, font color, spacing, etc.

Concept

- In this section, we should explain the concept behind the title. Our app will be for android and it will do the following…

Data

- This section is mainly for Priyanka since she will be gathering the data

Sketches

- This section should be mainly visual with sketches of the app and a brief explanation of the image we use

Timeline

- I checked the first lesson and it said to include in a timeline what each member and what we will be individually doing so I think we can focus on this last
